"Did you know there are only 2 ozs of a difference between the sizes of Taylor bowls? This small difference ensures you get a precise fit for all different hand sizes. There is no need for half sizes in the Taylor range. In fact many bowlers find, if they need to come down in size, it is often 2 sizes due to such a small difference between them".

Coloured bowls available in heavy weight only. All bowls sold in sets of 4.

As a tolerance is allowed during production, this table is for guidance only.
